

**SCAN! joined with 6 other organizations, together representing approximately 750 seniors, to send this message of solidarity to youth on the occasion of their Global Strike on September 23, 2022**

We want you to know that the generations who have preceded you – the generations of your grandparents and your great grandparents – support you.

Over the last 6 -10 decades we have seen the deterioration in the environment, the destruction of habitat, and the pollution of the air and water. We have seen the response of nature in the form of a dramatic increase in number and intensity of storms, flooding, drought and wildfires

In our time we witnessed the emergence of the environmental movement and the warnings forecasting climate destruction. And we have seen the failure to act of those who have the power to do so.

Like you, we are very concerned and indeed very frightened about the future of life on the planet.

But we take inspiration from you. We see hope in action.

Your generation is not alone. The generation of your grandparents and great grandparents is also organizing. Our numbers are growing, and we support you and will join with you to change the world.
