

## December is CPPIB Divestment Postcard Month!

### Tell the CPPIB to Stop Funding the Climate Crisis!

Due to popular demand, SCAN!'s Canada Pension Plan postcard campaign is back! We have printed 3000 more postcards to pressure the Canada Pension Plan Investment Board to stop investing our retirement funds in fossil fuels and to invest in solutions to the climate crisis. We want CPPIB and its new Board Chair, Dean Connor, to know that SCAN! is watching them and that there is urgent need to act now.

And December is **CPPIB Divestment Postcard Month** so please take photos of yourself and a group of your friends mailing postcards and send the photos

to: [scandivestment@gmail.com](mailto:scandivestment@gmail.com) ■

CPPIB is the largest pension fund in Canada and one of the largest in the world. As of July 2022, CPPIB had nearly \$22 billion **OF OUR MONEY** invested in fossil fuel producers. CPPIB also privately owns oil and gas companies, pipelines and other fossil fuel infrastructure all over the world.

We have continued with the three hard-hitting postcards for you to send to key executives of the CPPIB. The cards have a strong message about the need for the CPPIB to divest from fossil fuels and there's space on the back for you to write your own message.
