Canada Pension Plan needs to:

Divest from fossil fuels including coal, oil, fossil gas and pipelines.
Invest in climate solutions such as renewable energy and public transportation.
Stop greenwashing and increase transparency about investment strategies and acquisitions.

What Can I Do?

SCAN! is calling for emergency climate action at all levels of Government.

Talk to your friends and family about CPP and fossil fuels. Attend CPP Investments public meetings and demand climate action. Go to the SCAN! website and watch for pension updates.

Canada is burning and our Canada Pension Plan (CPP) is fueling the fires.

We don't want our hard earned pension funds to be used in ways that threaten our children and grandchildren's future

- CPP is the largest pension fund in Canada and one of the largest in the world.
- CPP owns oil and gas companies, pipelines and other fossil fuel infrastructure in Canada and around the world.
- CPP has invested in new fossil fuel production.

Canada Pension Plan Investments:

(the investment arm of CPP)

CPP investments continues to invest billions of dollars in fossil fuel expansion, even as Canadians from coast to coast suffer from climate disasters.

3/12 directors of the CPP Investment Board have direct links to fossil fuel industry.

CPP investments continues to expand investments in industries that harm the health and well-being of Canadians.

CANADA IS BURNING:

- Hottest day ever recorded this summer (2024) and hottest year globally.
- Wildfires burned more than 5 million hectares in Canada, an area equal to the size of Nova Scotia (National Wildfire Situation Report, 2024).
- Insurance claims cannot replace lives, habitats and homes.
